Professional Summary

Electrical Design Engineer with 5+ years of industrial experience in switchgear panel design, solar systems, and electrical estimation. Specialized in EPLAN Electric P8, AutoCAD, and electrical documentation for LV systems. Proven ability to lead cross-functional teams, optimize design workflows, and deliver client-focused solutions. Adept at working with international clients, complying with global standards, and improving project delivery efficiency.

Technical Skills

Design & Drafting Tools: EPLAN Electric P8, EPLAN ProPanel, AutoCAD, CorelDRAW, SketchUp, MS Visio.

Simulation & Configuration: ETAP, Simaris Configuration, Simaris Design, Helioscope, PVsyst.

Data Analysis & Reporting: MS Excel, Power BI, MS PowerPoint

Other Tools: MS Word, MS Teams, MS Outlook

Soft Skills

Cross-functional collaboration, Client-facing communication, Project planning & delivery, Process optimization, Team leadership & mentoring, and Problem Solving.

Education

Bachelor of Engineering, Electrical Engineering | 2016 - 2020

NED University Of Engineering And Technology [CGPA – 3.78/4.0] -

Intermediate, Pre –Engineering | 2014 - 2016

St. Lawrence Govt. Degree Girls College [Percentage – 86.18%]

Professional Experience

Design Engineer

- **ACDC Electrical Services.** | June 2024 - Present

- Lead a team of 3 design engineers, overseeing task assignments, project workflows, and quality control to ensure on-time, high-standard deliverables.
- Collaborate with two international clients to align engineering outputs with global standards, ensuring all technical and quality requirements are consistently met.
- Design customized LV switchgear panels using EPLAN and AutoCAD, tailored to client specifications and regulatory standards.
- Develop client-specific EPLAN databases, including Macros and Placeholder objects, to streamline project design cycles and enhance engineering productivity.
- Prepare comprehensive IO lists and cable schedules for Distributed Control Systems (DCS), facilitating smooth integration and documentation.
- Conduct regular client meetings to present design proposals, resolve technical queries, and synchronize project timelines.

Design Engineer

- **Sunbeam Engineers (Pvt.) Ltd.** | May 2023 – May 2024

- Designed customized LV switchgear panels in compliance with client requirements, safety regulations, and performance standards.
- Selected and calculated appropriate ratings for breakers, contactors, cables, and busbars based on load analysis and project scope.
- Produced accurate electrical schematics using EPLAN and AutoCAD, clearly depicting wiring routes, panel layouts, and interconnections.
- Collaborated closely with project managers, engineers, and field technicians to ensure end-to-end coordination and successful on-site implementation.
- Contributed to improving design efficiency and client satisfaction by proactively resolving technical concerns during the design-review process.

Design & Estimation Engineer

- **Accrescent Engineers (Pvt.) Ltd.** | *Dec 2021 - May 2023*

- Analyzed client tender documents, drawings, and specifications to develop accurate project estimations and competitive proposals.
- Enhanced the preparation of cost sheets and Bill of Quantities (BOQ) using advanced Excel functions, reducing errors and improving turnaround time by 50%.
- Created BMS Control Diagrams and Network Layouts using AutoCAD, CorelDRAW, and MS Visio to visualize and document system integration plans.
- Reviewed and adjusted technical and commercial offers based on client feedback, ensuring accurate documentation of revisions and approvals.
- Ensured compliance with engineering standards and client expectations by preparing detailed documentation under the guidance of the Lead Manager.

Technical Sales Engineer

- **AE Power (Pvt.) Ltd.** | *Jun 2021 – Nov 2021*

- Proactively contacted regular and potential customers to showcase products, outline their features and benefits, and increased monthly sales by 15%.
- Evaluate customer requirements, related to technical and commercial solutions to meet their expectations.
- Prepare comprehensive quotations in compliance with company standards and client requirements.
- Conclude sales agreements by reaching mutually acceptable terms and conditions with customers.

Internships

Data Science & Business Analytics Intern.

- **The Spark Foundation** | *Feb 2023 – Mar 2023*

- Developed expertise in data visualization using tools such as Power BI, Seaborn, and Matplotlib, resulting in the creation of visually appealing and informative visualizations.
- Demonstrated proficiency in data manipulation and analysis using Excel & Python, including the ability to work with large and complex datasets.

Engineering Intern.

- **Sui Southern Gas Company** | *Mar 2020 – Apr 2020*

- Services Department - Electrical Power Generation and HVAC.
- Detail analysis & calculation of energy benefits & cost saving by replacing four older engines with six new engines.

Engineering Intern.

- **Artistic Milliners (Pvt.) Ltd.** | *Feb 2023 – Mar 2023*

- Surveyed the end-to-end denim manufacturing process with emphasis on energy usage and control systems.
- Analyzed electrical Single Line Diagrams (SLDs) and control panel wiring, including power/control circuits, switches, motor drives, contactors, and overcurrent protection devices.

Volunteer Work

Project Collaborator.

- **Omdena** | *Feb 2023 – Dec 2023*

- Collaborated on Omdena Local Chapter projects involving real-world data analysis and machine learning challenges.
- Participated in data collection, cleaning, feature engineering, model development, and visualization using tools such as SQL, Pandas, NumPy, Matplotlib, Seaborn, and Scikit-Learn.
- Delivered actionable insights and findings through clear documentation, dashboards, and team presentations.

Courses & Certificates

Building Controls, [Schneider Electric University](#)

Solar Energy and Electrical System Design, [University of Buffalo](#).

AutoCAD 2D & 3D, [CADCIM Technologies](#).

Teamwork Skills: Communicating Effectively In Groups, [University of Colorado Boulder](#).

Project Management, [BitDegree](#).

Excel Course- Spreadsheet Formulas For Finance, [Corporate Finance Institute](#).

International Leadership Conference, [NEDUET](#).
